# 2012 Greater Fargo-Moorhead Community Health Needs Assessment of Community Leaders

Results of a May 2012 survey of community leaders in Cass County, North Dakota and Clay County, Minnesota

July 2012

**Prepared by:** Center for Social Research at North Dakota State University, Fargo

**Prepared for:** Fargo-Moorhead Community Health Needs Assessment Collaborative

### PREFACE

This report, entitled 2012 Greater Fargo-Moorhead Community Health Needs Assessment of Community Leaders, presents the results of a May 2012 survey of community leaders in Cass County, North Dakota and Clay County, Minnesota.

The study was conducted by the Center for Social Research at North Dakota State University on behalf of the Fargo-Moorhead Community Health Needs Assessment Collaborative. Funding for the study was provided by Collaborative member organizations.

The 2012 Greater Fargo-Moorhead Community Health Needs Assessment of Community Leaders is a companion report to the 2012 Greater Fargo-Moorhead Community Health Needs Assessment of Residents.

The Fargo-Moorhead Community Health Needs Assessment Collaborative wishes to thank the community leaders for their participation in this study. The Collaborative extends special thanks to the two mayors and five City Council/Commission members for their attendance and participation. Thanks are also extended to area physicians and nurses, school superintendents and board members, as well as representatives for the mentally and physically disabled, social services, non-profit organizations, financial services, legal services, and faith-based organizations for their participation.

### **EXECUTIVE SUMMARY**

#### Introduction

The purpose of the community leader survey was to explore the views of key leaders in the greater Fargo-Moorhead area (e.g., health professionals, social workers, educators, elected leadership, and nonprofit leaders) regarding the resident population's health and the prevalence of disease and health issues within the community.

#### **Study Design and Methodology**

The Fargo-Moorhead Community Health Needs Assessment Collaboration (FMCHNAC) convened a breakfast meeting of community leaders in early May 2012. The breakfast meeting served as an opportunity for discussion as well as having stakeholders in attendance complete the community health needs assessment survey. Center for Social Research (CSR) staff attended the breakfast meeting and documented discussion notes during the meeting. A representative of the Collaborative entered the completed survey data into an Internet-based survey tool (i.e., Survey Monkey) designed by the CSR staff.

The survey instrument was the same instrument developed in collaboration with the FMCHNAC and used in the generalizable survey of residents of the Fargo-Moorhead metro area of Cass and Clay counties (detailed in a separate report), with 30 questions focusing on community assets, general concerns about communities, community health and wellness concerns, and demographic information. The community leaders' version of the survey also included a set of questions at the end relating to the respondents' name, title, affiliation, area of expertise, city/town, and state. These questions were included to fulfill the current interpretation of IRS requirements for non-profit hospitals conducting community health needs assessments as part of the new compliance requirements imposed by the Patient Protection and Affordable Care Act signed into law on March 23, 2010.

The list of community leaders invited to the breakfast meeting was generated by members of the Collaborative. In addition, Collaborative members emailed additional community leaders that were not able to attend the breakfast meeting with instructions for them to fill out the survey via the Internetbased survey tool. The data collection effort was organized by Collaborative members. Data were collected through mid-June. A total of 58 surveys were completed, including 44 at the breakfast meeting and 14 via the Internet survey link.

The findings from the community leaders' survey are <u>not generalizable</u> to the community. The findings offer important insight and should be interpreted as anecdotal narrative.

#### **Key Findings**

Respondents had very high levels of agreement that their community has educational opportunities and programs, the community is a good place to raise kids, and there is quality health care. However, respondents agreed the least that there is tolerance, inclusion, and open-mindedness in their community.

Respondents were most concerned about domestic violence and issues regarding the aging population (i.e., availability and cost of long-term care; availability of resources to help elderly stay in their homes; and availability of resources for family and friends caring for elders). Respondents were also concerned with issues regarding children and youth (i.e., availability and cost of quality child care, bullying,

availability and cost of services for at-risk youth, and child abuse and neglect). Environmental issues regarding garbage and litter, water quality, air quality, and noise levels were not a large concern.

Among health and wellness concerns, respondents were most concerned about the costs associated with health insurance, health care, and prescription drugs. Respondents were also concerned about physical health issues, particularly obesity, poor nutrition and eating habits, and inactivity or lack of exercise. The adequacy of health insurance (i.e., amount of co-pays and deductibles) and access to health insurance coverage (i.e., preexisting conditions), as well as chronic disease (e.g., diabetes, health disease, multiple sclerosis) and depression were also among the top health and wellness concerns among respondents. Respondents were least concerned about patient confidentiality and distance to health care services.

#### **Summary of Survey Results**

#### Community Assets/Best Things About Their Community

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," respondents were asked to rate their level of agreement with various statements about their community regarding people, services and resources, and quality of life.

Respondents indicated the top five community assets or best things about the community were: there are quality higher education opportunities and institutions, the community is a good place to raise kids, there are quality school systems and programs for youth, there is quality health care, and people are friendly, helpful, and supportive.

#### Services and resources

Respondents had high levels of agreement that there are quality higher education opportunities and institutions as well as quality school systems and programs for youth in their community (mean=4.74 and mean=4.43, respectively). Although still a moderate level of agreement, respondents agreed the least that there is effective transportation in their community (mean=3.39).

#### Quality of life

Respondents had a very high level of agreement that their community is a good place to raise kids (mean=4.62). Respondents had high levels of agreement with the remaining components of quality of life issues in their community. Means ranged from 4.19 to 4.07 with respect to the community being a healthy place to live; the presence of quality arts, cultural activities, events, and festivals; the community being a safe place to live with little or no crime; the community having a peaceful, calm, and quiet environment; and the community having many recreational, exercise, and sports activities.

#### <u>People</u>

Respondents had fairly high levels of agreement that people in their community are friendly, helpful, and supportive and that there is a sense of community or feeling connected to people who live here (mean=4.22 and mean=4.21, respectively). Among issues regarding people in the community, respondents agreed the least that there is tolerance, inclusion, and open-mindedness in their community (mean=3.45).

#### General Concerns About Their Community

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," respondents were asked to rate their level of concern with various statements about their community regarding economic issues, transportation, environment, children and youth, the aging population, and safety.

Respondents indicated the top five general concerns about the community were: domestic violence, the availability and cost of long-term care, the availability and cost of quality child care, the availability of resources to help the elderly stay in their homes, the availability of resources for family and friends caring for elders.

#### <u>Safety</u>

Regarding safety issues in their community, respondents were most concerned with domestic violence (mean=3.97) and child abuse and neglect (mean= 3.76). Respondents were least concerned with violent crimes (mean=3.09).

#### The aging population

With respect to the aging population in their community, respondents had moderately high concerns with the availability and cost of long-term care (mean=3.91), the availability of resources to help the elderly stay in their homes (mean=3.89), and the availability of resources for family and friends caring for elders (mean=3.86). Respondents were least concerned about the availability or cost of activities for seniors (mean=3.38).

#### Children and youth

Regarding children and youth, respondents were most concerned with the availability and cost of quality child care in their community (mean=3.91), bullying (mean=3.82), and the availability and cost of services for at-risk youth (mean=3.81). Respondents were least concerned with youth crime (mean=3.09).

#### Economic issues

Respondents had moderate levels of concern with respect to the availability of employment opportunities (mean=3.69), economic disparities between higher and lower classes (mean=3.64), homelessness (mean=3.64), and poverty (mean=3.62). Respondents were least concerned with the cost of living (mean=3.16).

#### **Transportation**

Respondents were most concerned with availability of good walking or biking options (mean=3.79). Respondents were least concerned with traffic congestion (mean=2.55).

#### Environment

Respondents were not very concerned with environmental issues in their community. Garbage and litter concerns (mean=2.55) were more of a concern than water (mean=2.34), noise (mean=2.28), and air quality (mean=2.17).

#### Health and Wellness Concerns About Their Community

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," respondents were asked to rate their level of concern with various health and wellness issues with respect to access to health care, physical and mental health, and substance use and abuse.

The top six health and wellness concerns among community leaders were: the cost of health insurance, the cost of health care, obesity, the cost of prescription drugs, poor nutrition and eating habits, and inactivity or lack of exercise.

#### Access to health care

Respondents had high levels of concern with respect to costs associated with health and wellness in their community. Cost of health insurance, cost of health care, and cost of prescription drugs were the top three concerns (mean=4.57, mean=4.48, and mean=4.34, respectively).

Respondents also had concerns with respect to access and the availability of health and wellness service providers in their community. Access to health insurance coverage, availability of prevention programs, availability and cost of dental and vision care, availability of and cost of dental and vision insurance coverage, coordination of care, and availability of mental health services and providers were all well above average in level of concern (means ranged from 4.16 to 3.98).

Respondents had below average levels of concern with distance to health care services (mean=2.60) and patient confidentiality (mean=2.52).

#### Physical and mental health

Regarding physical and mental health issues, respondents had the highest levels of concern with respect to obesity (mean=4.36), poor nutrition and eating habits (mean=4.28), inactivity and lack of exercise (mean=4.28), and chronic disease (mean=4.24). Respondents were least concerned with communicable disease (mean=3.31).

#### Substance use and abuse

The levels of concern among respondents regarding substance use and abuse issues in their community were fairly high. Respondents were most concerned about alcohol use and abuse (mean=4.12). Although still moderately high, respondents were least concerned about exposure to second-hand smoke (mean=3.72).

#### Personal Health Care Information

The top three reasons respondents gave for their choice of primary health care provider were quality of services, being influenced by their health insurance, and location (39.7 percent, 29.3 percent, and 27.6 percent, respectively).

Less than one in five respondents said they had not had a cancer screening or cancer care in the past year (17.2 percent). The most common reason for not having done so was because it was not necessary (60.0 percent). Fear, unfamiliarity with recommendations, and not knowing who to see were also reasons respondents gave (10.0 percent each).

The vast majority of respondents said they paid for health care costs by health insurance through an employer (91.4 percent); 43.1 percent of respondents paid using personal income.

#### Demographic Information

Most respondents are 45 to 64 years old (67.2 percent); one-fourth are 30 to 44 years old (25.9 percent).

Most respondents have a Bachelor's degree or higher (89.6 percent), including 58.6 percent who have a Graduate or Professional degree.

Two-thirds of respondents are female (65.5 percent).

Two in five respondents said their annual household income is \$70,000 to \$119,999 (38.6 percent); one in three respondents said their income is \$120,000 or more (35.1 percent).

The vast majority of respondents are white (96.6 percent).

One-third of respondents are the parent or primary caregiver of a child or children 18 years of age or younger (34.5 percent).

Most respondents are employed in health care (37.9 percent), followed by government (29.3 percent), and educational services (25.9 percent).

Among respondents who are employed in health care, 40.9 percent are an administrator and 27.3 percent work in public health.

#### **Companion Report Comparisons**

The 2012 Fargo-Moorhead Community Health Needs Assessment of Community Leaders is a companion report to the 2012 Fargo-Moorhead Community Health Needs Assessment of Residents. Caution should be used when interpreting the comparisons as findings from the community leaders' survey are not generalizable to the community.

Overall, community leaders had higher levels of agreement and higher levels of concern than did the residents.

Among community assets, both community leaders and residents agreed the most that there are quality higher education opportunities, institutions, school systems, and programs for youth, there is quality health care, and that it is a good place to raise kids. Compared to community leaders, residents agreed less that there is an engaged government and a sense that you can make a difference. Residents agreed the least that there is tolerance, inclusion, and open-mindedness, whereas community leaders agreed the least that there is effective transportation.

Among general concerns, both community leaders' and residents' top concerns were directed at the aging population (i.e., availability and cost of long-term care, availability of resources to help the elderly stay in their homes, availability of resources for family and friends caring for elders). However, community leaders were most concerned about domestic violence. Availability of quality child care and bullying were also among the top concerns among community leaders, whereas availability of employment opportunities and the presence and influence of drug dealers in the community were top concerns among residents. Both community leaders and residents were least concerned about environmental issues (i.e., garbage and litter, water quality, air quality, and noise levels).

Among health and wellness concerns, both community leaders' and residents' top concerns were access-related issues (i.e., the cost of health insurance, the cost of health care, and the cost of prescription drugs). With respect to physical and mental health, community leaders were most concerned about obesity, poor nutrition and eating habits, and inactivity or lack of exercise. Residents, on the other hand, were more concerned about cancer, chronic disease, and obesity. Both community leaders and residents were least concerned about communicable disease and suicide.

With respect to demographic characteristics, community leaders tended to be more highly educated and have higher incomes than residents overall. While the gender distribution among residents was evenly split, a larger proportion of community leaders who completed the survey were female.

### SURVEY RESULTS

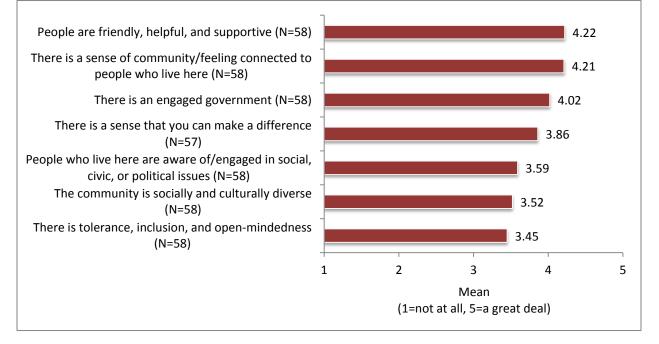

#### **Community Assets/Best Things About Their Community**

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," respondents were asked to rate their level of agreement with various statements regarding PEOPLE, SERVICES AND RESOURCES, and QUALITY OF LIFE in their community.

Overall, respondents had moderately high levels of agreement regarding positive statements that reflect the people in their community (*Figure 1, Appendix Table 1*).

- On average, respondents agreed the most that people in their community are friendly, helpful, and supportive (mean=4.22); 31.0 percent agreed a great deal.
- Respondents also had a fairly high level of agreement that there is a sense of community or feeling connected to people who live here (mean=4.21); 32.8 percent agreed a great deal.
- Although still a moderate level of agreement, respondents agreed the least that there is tolerance, inclusion, and open-mindedness in their community (mean=3.45); only 3.4 percent of respondents agreed a great deal.

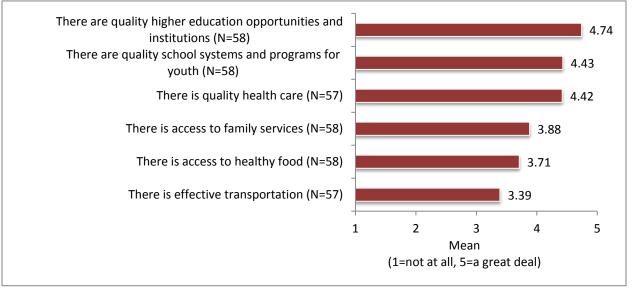

Figure 1. Respondents' level of agreement with statements about their community regarding PEOPLE

Overall, respondents had a high level of agreement with positive statements regarding services and resources issues in their community (*Figure 2, Appendix Table 2*).

- On average, respondents agreed the most that there are quality higher education opportunities and institutions in their community (mean=4.74); 77.6 percent agreed a great deal. Respondents also had a high level of agreement that there are quality school systems and programs for youth (mean=4.43) and that there is quality health care (mean=4.42).
- Although still moderate in their level of agreement, respondents agreed the least that there is effective transportation in their community (mean=3.39).

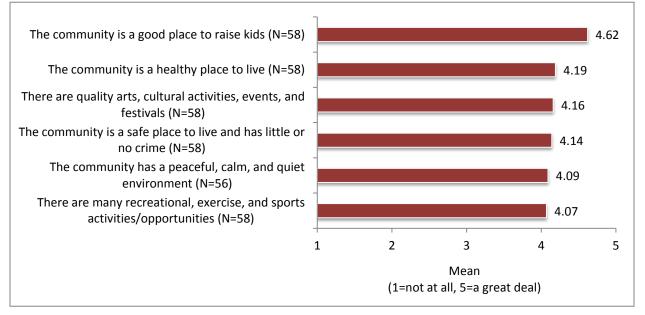

Figure 2. Respondents' level of agreement with statements about their community regarding SERVICES AND RESOURCES

Overall, respondents had a high level of agreement with positive statements regarding quality of life in their community (*Figure 3, Appendix Table 3*).

• On average, respondents agreed the most that their community is a good place to raise kids and that it is a healthy place to live (mean=4.62 and mean=4.19, respectively).

Figure 3. Respondents' level of agreement with statements about their community regarding QUALITY OF LIFE

Respondents were asked to describe other best things about their community (see Appendix Table 4 for a list of themes).

• Respondents mentioned the strong partnerships and collaborations that are working to create healthier communities. Faith and religious organizations that are addressing social concerns and supporting the community were also mentioned. Respondents also said that affordable housing was another asset within the community.

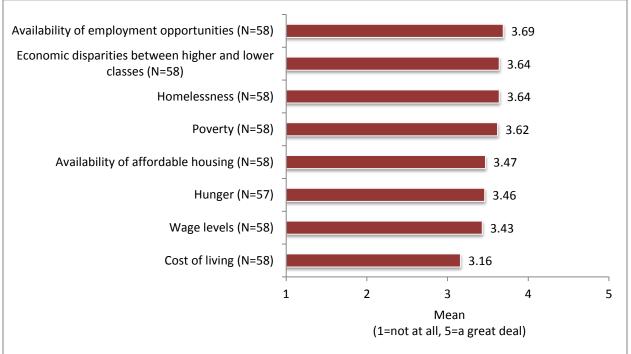

#### **General Concerns About Their Community**

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," respondents were asked to rate their level of concern with various statements regarding ECONOMIC ISSUES, TRANSPORTATION, ENVIRONMENT, CHILDREN AND YOUTH, THE AGING POPULATION, and SAFETY in their community.

Overall, respondents had a moderate level of concern with economic issues in their community (*Figure 4, Appendix Table 5*).

- On average, respondents were most concerned with the availability of employment opportunities (mean=3.69), economic disparities between higher and lower classes (mean=3.64), homelessness (mean=3.64), and poverty (mean=3.62).
- Although still moderately concerned, on average, respondents were least concerned with the cost of living in their community (mean=3.16).

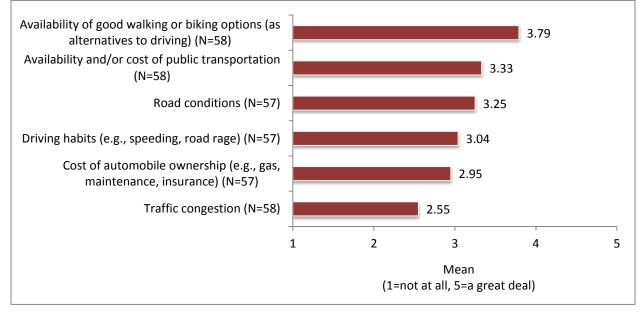

Overall, respondents had a moderate level of concern with transportation issues in their community (*Figure 5, Appendix Table 6*).

- On average, respondents were most concerned with the availability of good walking or biking options (mean=3.79), the availability and cost of public transportation (mean=3.33), and road conditions (mean=3.25).
- On average, respondents were least concerned with traffic congestion (mean=2.55).

Figure 5. Respondents' level of concern with statements about their community regarding TRANSPORTATION

Overall, respondents were not that concerned with environmental issues in their community (*Figure 6, Appendix Table 7*).

• On average, respondents had a higher level of concern with garbage and litter (mean=2.55).

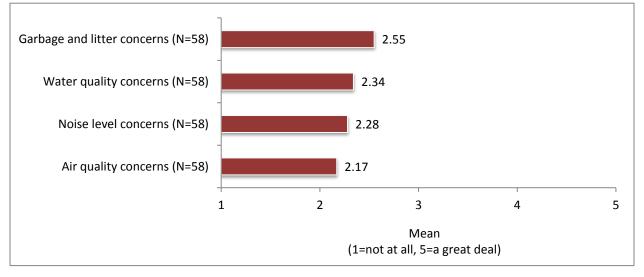

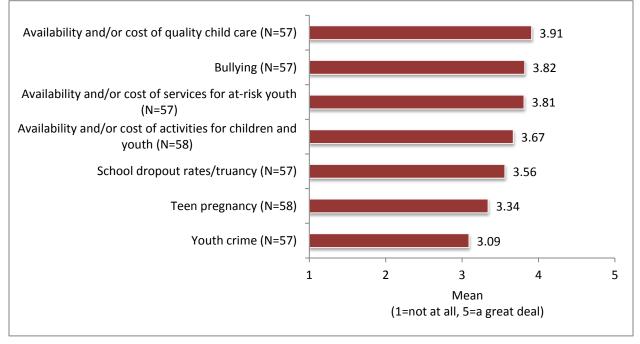

Figure 6. Respondents' level of concern with statements about their community regarding ENVIRONMENT

Overall, respondents had a moderate level of concern with issues relating to children and youth in their community (*Figure 7, Appendix Table 8*).

- On average, respondents were most concerned about the availability or cost of quality child care (mean=3.91), bullying (mean=3.82), and the availability and cost of services for at-risk youth (mean=3.81).
- Although still moderately concerned, on average, respondents were least concerned with youth crime (mean=3.09).

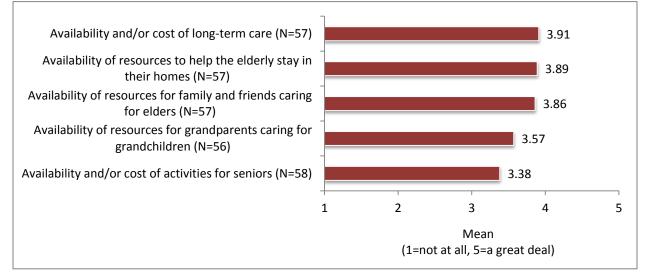

Figure 7. Respondents' level of concern with statements about their community regarding CHILDREN AND YOUTH

Overall, respondents had moderately high levels of concern with issues relating to the aging population in their community (*Figure 8, Appendix Table 9*).

- On average, respondents were most concerned about the availability and cost of long-term care (mean=3.91), the availability of resources to help the elderly stay in their homes (mean=3.89), and the availability of resources for family and friends caring for elders (mean=3.86).
- Although still moderately concerned, on average, respondents were least concerned about the availability and cost of activities for seniors (mean=3.38).

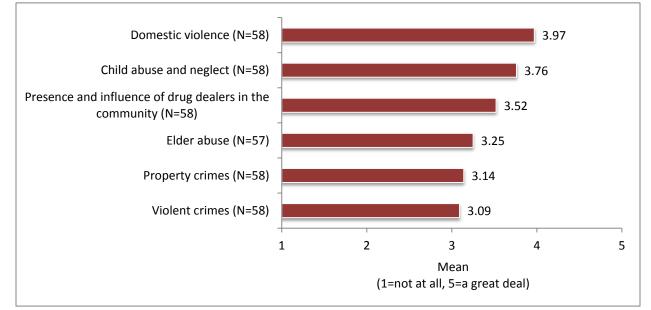

Figure 8. Respondents' level of concern with statements about their community regarding THE AGING POPULATION

Overall, respondents had a moderately high level of concern with safety issues in their community (*Figure 9, Appendix Table 10*).

- On average, respondents were most concerned with domestic violence (mean=3.97), child abuse and neglect (mean=3.76), and the presence and influence of drug dealers in the community (mean=3.52).
- Although still moderately concerned, on average, respondents were least concerned about violent crimes (mean=3.09).

Respondents were asked to describe other community concerns (see *Appendix Table 11 for a list of themes*).

- Some respondents said the community should support policies that promote health, such as land use policies, Safe Routes to School, and the inclusion of parks, trails, and gardening in new developments. More recycling was also mentioned.
- Access to quality education and funding for K-12, and sufficient support programs for teen and single parents and for physically or mentally disabled persons were also concerns.

#### Health and Wellness Concerns About Their Community

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," respondents were asked to rate their level of concern about health and wellness issues in their community regarding ACCESS TO HEALTH CARE, PHYSICAL AND MENTAL HEALTH, and SUBSTANCE USE AND ABUSE.

Overall, respondents had high levels of concern regarding several issues associated with access to health care in their community (*Figure 10, Appendix Table 12*).

- Respondents were most concerned about cost issues:
  - Cost of health insurance (mean=4.57); 63.8 percent were concerned a great deal.
  - Cost of health care (mean=4.48); 53.4 percent were concerned a great deal.
  - Cost of prescription drugs (mean=4.34); 51.7 percent were concerned a great deal.
  - Adequacy of health insurance (e.g., amount of copays, deductibles) (mean=4.24); 46.6 percent were concerned a great deal.
- Respondents also had moderately high levels of concern regarding access and availability of health and wellness coverage, providers, and services:
  - Access to health insurance coverage (e.g., preexisting conditions) (mean=4.16); 44.8 percent were concerned a great deal.
  - Availability of prevention programs or services (mean=4.07); 43.1 percent were concerned a great deal.
  - Availability and/or cost of dental and/or vision care (mean=4.02); 34.5 percent were concerned a great deal.
  - Coordination of care (mean=4.00); 41.4 percent were concerned a great deal.
  - Availability and/or cost of dental and/or vision insurance coverage (mean=4.00); 36.2 percent were concerned a great deal.
  - Availability of mental health services and providers (mean=3.98); 39.7 percent were concerned a great deal.
- Among health care access issues, respondents had the least concern for distance to health care services and patient confidentiality:
  - Distance to health care services (mean=2.60).
  - Patient confidentiality (mean=2.52).

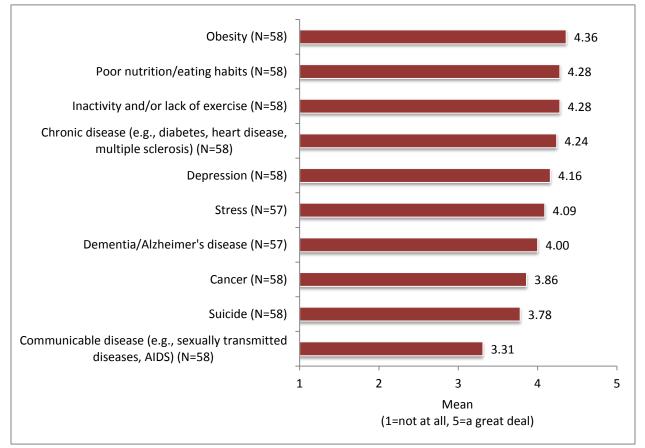

# Figure 10. Respondents' level of concern with statements about their community regarding ACCESS TO HEALTH CARE

| 1 2 3 4 5                              |
| Mean<br>(1=not at all, 5=a great deal) |
|  |

Overall, respondents had high levels of concern regarding physical and mental health issues in their community (*Figure 11, Appendix Table 13*).

- On average, respondents indicated the physical and mental health issues they were most concerned about in their community were obesity, poor nutrition and eating habits, inactivity and/or lack of exercise, and chronic disease (mean=4.36, mean=4.28, mean=4.28, and mean=4.24, respectively).
- Although still a moderate level of concern, on average, respondents were least concerned about communicable disease (mean=3.31).

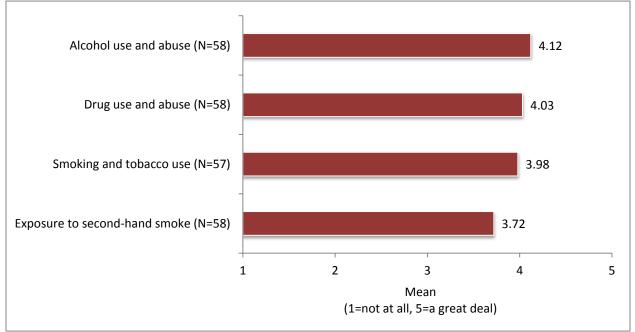

Figure 11. Respondents' level of concern with statements about their community regarding PHYSICAL AND MENTAL HEALTH

Overall, respondents' levels of concern regarding substance use and abuse in their community were very similar and fairly high (*Figure 12, Appendix Table 14*).

- On average, respondents were most concerned about alcohol use and abuse and drug use and abuse (mean=4.12 and mean=4.03, respectively).
- Although still a moderately high level of concern, on average, respondents were least concerned with exposure to second-hand smoke (mean=3.72).

Respondents were asked to describe other health and wellness concerns in their community (see *Appendix Table 15* for a list of themes).

- Access to services, such as health care, dental care, urgent and preventive, and primary care for children was a concern listed by respondents.
- Some respondents would like to see better quality foods made available to schools, and local, wholesale, unprocessed foods made more readily available in order to make healthier choices.

#### Personal Health Care Information (Appendix Tables 16-20)

- Three in five respondents said they use Sanford Health as their primary health care provider (62.1 percent); one in four said they use Essentia Health (27.6 percent).
- The top three reasons respondents gave for their choice of primary health care provider were quality of services, being influenced by their health insurance, and location (39.7 percent, 29.3 percent, and 27.6 percent, respectively).
- Less than one in five respondents said they had not had a cancer screening or cancer care in the past year (17.2 percent).
- Among those who had not had a screening or cancer care in the past year, 60.0 percent said the reason they had not done so was because it was not necessary. Fear, unfamiliarity with recommendations, and not knowing who to see were also reasons respondents gave (10.0 percent each).
- The vast majority of respondents said they paid for health care costs for themselves or family members over the past 12 months by health insurance through an employer (91.4 percent); 43.1 percent of respondents paid using personal income.

#### **Demographic Information (Appendix Tables 21-30)**

- Two-thirds of respondents are 45 to 64 years old (67.2 percent); one-fourth are 30 to 44 years old (25.9 percent).
- Nine in 10 respondents have a Bachelor's degree or higher (89.6 percent), including 58.6 percent who have a graduate or professional degree.
- Two-thirds of respondents are female (65.5 percent).
- Nearly all respondents work or volunteer outside the home (98.3 percent).
- Two in five respondents said their annual household income is \$70,000 to \$119,999 (38.6 percent); one in three respondents said their income is \$120,000 or more (35.1 percent).
- The vast majority of respondents own their home (94.8 percent).
- The vast majority of respondents are white (96.6 percent).
- One-third of respondents are the parent or primary caregiver of a child or children 18 years of age or younger (34.5 percent).
- Most respondents are employed in health care (37.9 percent), followed by government (29.3 percent), and educational services (25.9 percent).
- Among respondents who are employed in health care, 40.9 percent are an administrator; 27.3 percent work in public health.

#### **Community Assets/Best Things About Their Community**

\*Percentages do not equal 100.0 due to multiple responses.

#### **Demographic Information**

#### Appendix Table 21. Respondents' age

| Age                  | Percent of respondents<br>(N=58) |
|----------------------|----------------------------------|
| 18 to 29 years       | 1.7                              |
| 30 to 44 years       | 25.9                             |
| 45 to 64 years       | 67.2                             |
| 65 to 74 years       | 5.2                              |
| 75 years or older    | 0.0                              |
| Prefer not to answer | 0.0                              |
| Total                | 100.0                            |

#### Appendix Table 22. Respondents' highest level of education

| Highest level of education      | Percent of respondents<br>(N=58) |
|---------------------------------|----------------------------------|
| Some high school                | 0.0                              |
| High school diploma or GED      | 3.4                              |
| Some college/no degree          | 3.4                              |
| Associate's degree              | 3.4                              |
| Bachelor's degree               | 31.0                             |
| Graduate or professional degree | 58.6                             |
| Prefer not to answer            | 0.0                              |
| Total                           | 99.8                             |

#### Appendix Table 23. Respondents' gender

| Gender               | Percent of respondents<br>(N=58) |
|----------------------|----------------------------------|
| Male                 | 34.5                             |
| Female               | 65.5                             |
| Prefer not to answer | 0.0                              |
| Total                | 100.0                            |

#### Appendix Table 24. Whether respondents work/volunteer outside the home

| Work/volunteer       | Percent of respondents<br>(N=58) |
|----------------------|----------------------------------|
| Yes                  | 98.3                             |
| No                   | 1.7                              |
| Prefer not to answer | 0.0                              |
| Total                | 100.0                            |

#### Appendix Table 25. Respondents' annual household income before taxes

| Annual household income before taxes | Percent of respondents<br>(N=57) |
|--------------------------------------|----------------------------------|
| Less than \$20,000                   | 0.0                              |
| \$20,000 to \$39,999                 | 1.8                              |
| \$40,000 to \$69,999                 | 19.3                             |
| \$70,000 to \$119,999                | 38.6                             |
| \$120,000 or more                    | 35.1                             |
| Do not know/prefer not to answer     | 5.3                              |
| Total                                | 100.1                            |

#### Appendix Table 26. Whether respondents own or rent their home

| Tenure               | Percent of respondents<br>(N=58) |
|----------------------|----------------------------------|
| Tenure               | (14-30)                          |
| Own                  | 94.8                             |
| Rent                 | 3.4                              |
| Prefer not to answer | 1.7                              |
| Other                | 0.0                              |
| Total                | 99.9                             |

Appendix Table 27. Respondents' race or ethnicity

| Race/ethnicity                | Percent of respondents* |
|-------------------------------|-------------------------|
| White                         | 96.6                    |
| Black/African American        | 0.0                     |
| Native American/Alaska Native | 0.0                     |
| Asian/Pacific Islander        | 0.0                     |
| Hispanic                      | 3.4                     |
| Other                         | 0.0                     |

N=58

\*Percentages do not equal 100.0 due to multiple responses.

Appendix Table 28. Whether respondents are the parent or primary caregiver of a child or children 18 years of age or younger

|                             | Percent of respondents |  |  |
|-----------------------------|------------------------|--|--|
| Parent or primary caregiver | (N=58)                 |  |  |
| Yes                         | 34.5                   |  |  |
| No                          | 65.5                   |  |  |
| Prefer not to answer        | 0.0                    |  |  |
| Total                       | 100.0                  |  |  |

#### Appendix Table 29. Respondents' area of employment

| Area of employment        | Percent of respondents* |
|---------------------------|-------------------------|
| Health care               | 37.9                    |
| Retail trade              | 1.7                     |
| Educational services      | 25.9                    |
| Arts/entertainment        | 0.0                     |
| Agriculture               | 0.0                     |
| Construction              | 0.0                     |
| Government                | 29.3                    |
| Manufacturing             | 0.0                     |
| Not applicable            | 0.0                     |
| Other:                    | 24.1                    |
| Social services (4)       |                         |

| Development and health promotion (1)     |                         |

N=22

\*Percentages do not equal 100.0 due to multiple responses.

Appendix Table 31. Additional concerns and suggestions

| Comments  |
|---|
| Provide a noise and litter ordinance.   |
| [There is a] lack of available resources for the mentally ill.  |
| Sharing listserv or contact list of this group.   |
| We need to be a visibly "breast feeding friendly" community. Signs: BF welcome here. Make it easy for |
| women to BF.  |
| Thank you for including me in this discussion.  |
| Great meeting.  |
| Look for increased cooperation between major clinics and health oriented non-profits (arthritis       |
| Foundation, Heart Assoc., etc.,) to avoid duplication of services, increase patient education.        |
|   |

April 16, 2012

To: Community Leaders

#### From: The Fargo Moorhead Community Health Needs Assessment Collaborative

#### RE: 2012-2013 Community Health Needs Assessment Key Stakeholders Meeting

You are receiving this invitation because you have been identified as a key community leader and stake holder. **Please join us on May 3, 2012 at 7:00 a.m. at the Holiday Inn** (3803 13th Avenue South, Fargo) for a discussion and survey of the community health needs. Breakfast will be served.

Part of the IRS 990 requirement for a not-for-profit health system is to address issues that have been assessed as an unmet need in the community. Conducting a Community Health Needs Assessment is a requirement of the 2010 Health Care Reform Act. Both Essentia Health and Sanford Health are required to complete this assessment and to secure input from the groups of key community leaders.

In May 2011, the Greater Fargo Moorhead Community Health Needs Assessment Collaborative was established, and has been busy developing standardized data reporting. This data will then be used by each organization to complete their individual assessments and IRS requirements. By developing a collaborative approach, we are better utilizing the financial and personnel resources available to create plans for improving the health of our communities.

The Fargo Moorhead Community Health Needs Assessment Collaborative includes:

- Center for Rural Health
- Clay County Public Health
- Dakota Medical Foundation
- Essentia Health
- Family HealthCare Center
- Fargo Cass Public Health
- NDŠU
- Sanford Health
- Southeast Human Service Center
- United Way of Cass-Clay

Please RSVP by April 30 to Mary Lake at Sanford Health at Mary.Lake@sanfordhealth.org or

701.234.6951 Thank you.

United Way of Cass-Clay

219 7th Street South | P.O. Box 1609 | Fargo, ND 58107-1609 | 701.237.5050 | www.unitedwaycassclay.org United Way of Cass-Clay brings people together to create lasting change that will improve lives.

The FM Community Health Needs Assessment Collaborative invites you to participate in the 2012 Community Health Needs Assessment. The information that we gather from you will be important for the future development of an action plan to address the identified unmet needs in the community. Your participation in this work is important to the community health improvement for all of our communities.

Please take a moment to complete the survey. You may skip any questions that you do not wish to answer. Your answers will be combined with other responses and reported in aggregate form. If you have any questions about the survey, you may contact Kay Schwarzwalter at 701-231-1058 or by email at kay.schwarzwalter@ndsu.edu.

COMMUNITY ASSETS/BEST THINGS ABOUT YOUR COMMUNITY

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," please tell us your level of agreement with each of the following statements about your community regarding PEOPLE, SERVICES AND RESOURCES, and QUALITY OF LIFE.

Considering your community, what is your level of agreement with...

#### **1. PEOPLE**

|   | 1=Not at all | 2       | 3 | 4 | 5=A great deal |
|---|--------------|---------|---|---|----------------|
| a. People are friendly, helpful, supportive.  | O            | 0       | 0 | 0 | O              |
| b. There is a sense of community/feeling<br>connected to people who live here.      | Õ            | O       | O | O | C              |
| c. People who live here are aware of/engaged in social, civic, or political issues. | O            | O       | 0 | 0 | C              |
| d. The community is socially and culturally diverse.                                | C            | 0       | O | O | 0              |
| e. There is an engaged government.  | C            | $\odot$ | 0 | O | O              |
| f. There is tolerance, inclusion, and open-<br>mindedness.                          | O            | C       | O | 0 | C              |
| g. There is a sense that you can make a difference.                                 | O            | O       | 0 | O | O              |
| 2. SERVICES AND RESOURCES   | 1=Not at all | 2       | 3 | 4 | 5=A great deal |

|   | 1=Not at all | 2 | 3 | 4 | 5=A great deal |
|---|--------------|---|---|---|----------------|
| a. There are quality school systems and programs for youth.           | 0            | O | 0 | O | C              |
| b. There are quality higher education opportunities and institutions. | O            | 0 | O | O | C              |
| c. There is quality health care.                                      | O            | O | 0 | O | O              |
| d. There is effective transportation.                                 | 0            | O | 0 | 0 | 0              |
| e. There is access to healthy food.                                   | 0            | O | 0 | O | O              |
| f. There is access to family services.                                | C            | 0 | 0 | 0 | C              |

Using a 1 to 5 scale, with 1 being "not at all" and 5 being "a great deal," please tell us your level of agreement with each of the following statements about your community.

#### **3. QUALITY OF LIFE**

|  | 1=Not at all | 2 | 3       | 4       | 5=A great deal |
|--|--------------|---|---------|---------|----------------|
| a. The community is a safe place to live and has little or no crime.           | O            | O | 0       | O       | C              |
| b. The community is a good place to raise kids.                                | O            | 0 | $\odot$ | $\odot$ | Õ              |
| c. The community has a peaceful, calm, and quiet environment.                  | O            | O | 0       | O       | C              |
| d. The community is a healthy place to live.                                   | O            | Ô | O       | $\odot$ | Õ              |
| e. There are quality arts, cultural activities, events, and festivals.         | O            | O | O       | O       | C              |
| f. There are many recreational, exercise, and sports activities/opportunities. | C            | C | C       | 0       | O              |

# 4. What are other "best things" about your community that are not reflected in the questions above?

#### GENERAL CONCERNS ABOUT YOUR COMMUNITY

Using a 1 to 5 scale, with one being "not at all" and 5 being "a great deal," please tell us the level of concern you have about your community in each of the following areas: ECONOMIC ISSUES, TRANSPORTATION, ENVIRONMENT, CHILDREN AND YOUTH, THE AGING POPULATION, and SAFETY.

Considering your community, what is your level of concern with...

#### **5. ECONOMIC ISSUES**

|  | 1=Not at all | 2       | 3       | 4       | 5=A great deal |
|--|--------------|---------|---------|---------|----------------|
| a. Availability of affordable housing                    | O            | O       | 0       | 0       | C              |
| b. Availability of employment opportunities              | C            | O       | O       | 0       | O              |
| c. Wage levels   | C            | $\odot$ | O       | $\odot$ | O              |
| d. Poverty   | $\odot$      | $\circ$ | O       | O       | C              |
| e. Homelessness  | $\odot$      | $\odot$ | C       | $\odot$ | C              |
| f. Cost of living  | O            | O       | $\odot$ | $\odot$ | O              |
| g. Economic disparities between higher and lower classes | C            | O       | O       | O       | C              |
| h. Hunger  | C            | 0       | 0       | 0       | C              |

Using a 1 to 5 scale, with one being "not at all" and 5 being "a great deal," please tell us the level of concern you have about your community in each of the following areas.

#### 6. TRANSPORTATION

|  | 1=Not at all | 2          | 3       | 4       | 5=A great deal |
|--|--------------|------------|---------|---------|----------------|
| a. Traffic congestion  | O            | $\odot$    | $\odot$ | O       | O              |
